SERIES 2000 ACCESS DOOR SYSTEM

Unlimited Shapes

Application

Our new ACCESS DOOR/HATCH can be used in a wide range of marine applications. With a tight sealing inside gasket that completely surrounds the opening, these doors can be used in both interior or exterior. From bait and equipment compartment doors on fishing boats to interior locker doors and access hatches on larger boats. The clamp ring or clips can be trimmed to fit varying bulkhead and deck thicknesses. These hatches are ideal for solving access problems to available storage areas in any size boat.
