

Design Information

Available Configurations:

Panel:	Operation:	Use:
Single	Left/Right	Inside/Outside
Double	X	X
Multiple	X	X
Angled *	X	X
Radius *	X	X

*Details Available upon request

Application

Series 1400-B Sliding Windows are generally used as a cabin/venting system and are appropriate for motor yachts, sport cruisers, and houseboats.

Fabrication

The master frame of aluminum extrusion is welded for structural strength with all non-ferrous fasteners used in the final assembly. Slide panels allow for glazing of either 3/16" or 1/4" tempered glass. Master frame flanges allow for ease of installation.

Hardware

Marine quality latches, handles, and screens are available upon request.

Finish

Marine grade urethanes and polyester powder coatings in various standard and custom colors are available.
