

Design Information

Available Configurations:

Application

Series 1400-E Fixed Windows are used generally as windshield and non-vent cabin units. These can also be used in door systems as viewing glass, and are appropriate for most motor yachts, sport cruisers, and houseboats.

Fabrication

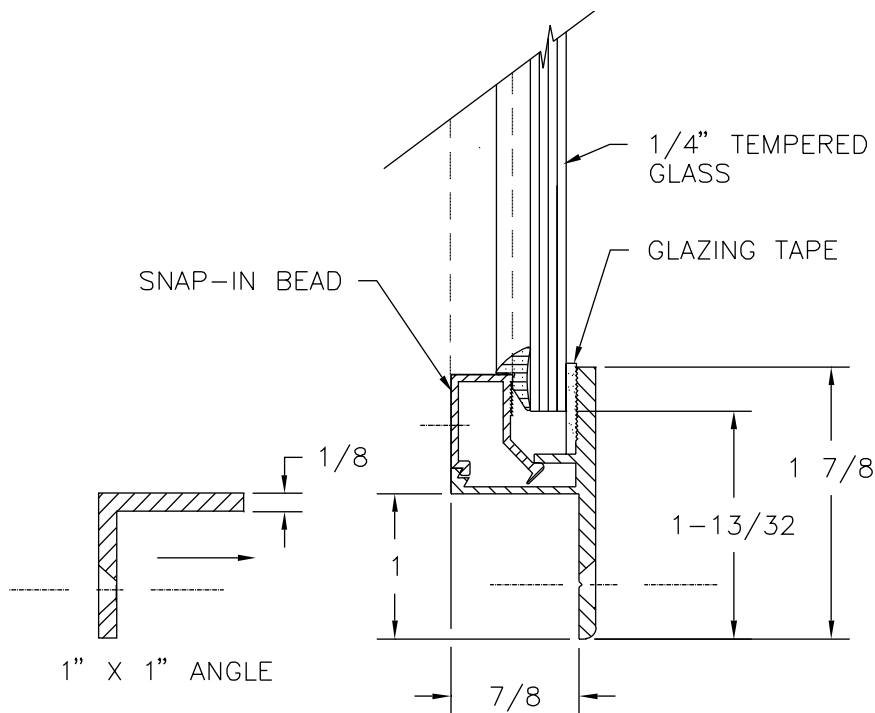

The master frame of aluminum extrusion is welded for structural strength. Frame assembly allows for glazing of standard 1/4" tempered glass. (opt. 3/8") Master frame flanges allow for ease of installation.

Hardware

Marine quality weathertaskets and trims are always standard.

Finish

Marine grade urethanes and polyester powder coatings in various standard and custom colors are available.
