

# Design Information

## Available Configurations:

<b>Panel:</b>	<b>Operation:</b>	<b>Use:</b>
Single	Left/Right	Outside

## Application

Series 1600-E Sliding Doors are generally used in cabin deck location as a entry system and are appropriate for motor yacht, sport cruisers, sail and express models.

## Fabrication

Master frame of aluminum extrusions are bent formed to match deck angle and mechanically assembled. Door panels are welded and allow for glazing of 1/4" acrylic panels. Low profile flanges allow for ease of installation.

## Hardware

Marine quality locksets, day-latches, handles and security systems are available upon request.

## Finish

Marine grade urethanes and polyester powder coatings in various standard and custom colors are available.
