

Design Information

Available Configurations:

FRONTS: Single or multi-fixed panels, with optional corners and hinged door.

WINGS: Almost unlimited wing shapes can be created. The wings can be fixed panels or vented with the shape determined by your design needs.

Application

Series 7500 Windshields are custom made to your design specifications. These are appropriate for motor yachts, sport and express cruisers or for any application where a solid, heavy-duty windshield is required.

Fabrication

The 7500 Series Windshield is an all aluminum, heavy-duty system that can include a hinged door, vented wings and stationary panels. Contact our design department for information on requirements for curved windshields designs.

Hardware

Only marine grade hardware is used, providing a long-lasting, quality unit.

Finish

We use only marine grade Polyester Powder Coatings in various standard and custom colors.
